The primary purpose of undertaking practical assessments, with observation is to collect workplace activities. The course modules (clusters) are sequenced in a way that allows a logical progression. Participants will be provided with professionally presented reference material to assist them to develop their knowledge of the subject.

The assessment is conducted using a combination of realistic workplace tasks, knowledge activities, portfolio development, response to case studies and feedback. The following provides a brief explanation of the assessment methods that are to be applied:

- **Demonstration / Role-Play.** The student is required to demonstrate a range of skills whilst being

- **Portfolio/MAT – Major Assessment Task.** The student is required to undertake a range of projects in the context of developing their own business or on a case study that is provided within the assessment material. A portfolio will require the creation of various workplace documents (business and celebrancy resources). Portfolios have a presentation component where the student will be asked to present the outcomes of their portfolios to a professional standard.
- **Training Designed Activities and Assessments.** The student is required to undertake a number of written knowledge activities and assessments over the course of their study. These activities and assessments will be provided to the student by the assessor at an arranged time and the student will be required to individually complete the activities. The student may research their answers from the course training materials and notes as well as relevant references.
- **Observation Report.** Observation reports will require feedback about the student's performance during a module. A briefing is provided before the student begins study to inform them of the module requirements. Observation assessment will occur as evidence collected.
